

# POWER UNITS

## Design Features

- Available in diesel or electric drive, each unit is self contained and includes everything necessary to power the Pipe Facing Machine
- Diesel Units come equipped with an electric start, water cooled, diesel engine
- Electric Units contain a heavy-duty industrial motor, disconnect switch with thermal protection, and an On/Off switch for operation. Electric Units are available in a variety of voltages and may be ordered as 50 Hz or 60 Hz
- All units come equipped with a dual-action hydraulic oil pump and a heavy-duty oil filter

## SPECIFICATIONS

Length	124"	3,150 mm
Width	50"	1,270 mm
Height	64"	1,626 mm

## ENGINES

Perkins Diesel	97	hp
Operating Speed	2200	rpm
Fuel Tank	40	gal

## HYDRAULICS

Pump Type	Vane, Fix Volume	
Pump Flow	70 gpm	
Valve Type	Manifold on Facing Machine	
Filtration	10 Micron, Pressure Line	
Hydraulic System Max Operating Pressure	2500	
Dydraulic Reservoir	100 gal	375 L
